# AWARENESS PAGE

This page contains Awareness about CKD

The screenshot shows a web browser window with the title bar 'Awareness about Kidney Disease'. The address bar shows the URL '127.0.0.1:5500/awareness.html'. The page content has a black background with white text. The word 'AWARENESS' is at the top in a large, multi-colored font. Below it is a subtitle 'This page gives you more awareness about the kidney disease'. The main text consists of five paragraphs discussing the low public awareness of kidney disease, its function as a blood filter, common misconceptions, and the need for more advertising. On the right side of the page is a photograph of a tall glass of orange juice next to two whole oranges and several orange slices. At the bottom of the browser window, the Windows taskbar is visible, showing the search bar and various application icons.

## AWARENESS

This page gives you more awareness about the kidney disease

Public awareness and media coverage of kidney disease is relatively low compared to other conditions, such as heart disease or cancer.

Many people we spoke to knew that the kidneys are a vital organ, that they act as a filter to remove waste products from the blood stream and that they are somehow connected to ‘the waterworks’.

However, the term ‘kidney disease’ may make people think of kidney failure, transplants and dialysis.

As Jim put it, “I knew you could get kidney failure and things like that, but I didn’t realise you could just get something small wrong with them”.

Some people thought there should be more advertising of kidney disease, especially what causes it, why kidneys are important

This page contains Awareness about what healthy foods are to be taken

A screenshot of a web browser displaying a page titled "Awareness about Kidney Disease". The browser's address bar shows the URL "127.0.0.1:5500/awareness.html". The page content is as follows:

## HEALTHY FOODS

**Tips for making healthy food choices:**

- Cook with a mix of spices instead of salt.
- Choose veggie toppings such as spinach, broccoli, and peppers for your pizza.
- Try baking or broiling meat, chicken, and fish instead of frying.
- Serve foods without gravy or added fats.
- Try to choose foods with little or no added sugar.
- Gradually work your way down from whole milk to 2 percent milk until you're drinking and cooking with fat-free (skim) or low-fat milk and milk products.
- Eat foods made from whole grains—such as whole wheat, brown rice, oats, and whole-grain corn—every day.
- Use whole-grain bread for toast and sandwiches; substitute brown rice for white rice for home-cooked meals and when dining out.

A large, high-quality image of a single red apple is positioned on the right side of the page, partially overlapping the text. The apple is shown from a slightly low angle, highlighting its stem and the natural texture of its skin.

At the bottom of the browser window, a Windows taskbar is visible, showing the search bar and several application icons. A watermark in the bottom right corner of the page reads "Activate Windows Go to Settings to activate Windows."
